2018

Education

MA(Hons) Fashion Design

Kingston University

Merit 2018 - 2020

BA(Hons) Fashion Design

University of Derby

1st Class 2014 - 2018

Taking on a variety of design briefs I gained confidence in my abilities as I won awards for competitions. Final outcomes included designing and producing womenswear collections, with digital outcomes such as a design portfolio and editorial press releases.

Profile

I am an enthusiastic full-stack developer with a particular flair for front-end technologies. My background (and passion!) in design has led me to some exciting projects including designing clothes for LFW, creating company logos, and branding websites. In my spare time I like to catch-up on art exhibitions, travel with friends and find any excuse to go to gigs. I took the leap into software development to pursue a more technical and purpose-led career, it also provides the opportunity for greater challenges to apply my problem solving skills to.

Projects

I am currently studying software development at IO Academy. I have worked on a variety of projects, both individually and in an agile scrum team. Below is a small selection of my favourites, please follow the link to my portfolio to see the rest.

Quotlefish

Developed an interactive Javascript movie-theme based quiz game, working as part of an agile team. Features include a timer, score counter and buttons with click event features. Some include a modal button, disabling and enabling buttons and hiding/showing hints based on user interactions.

MySQL

Javascript

Dunkin' Bisquids

An object-orientated PHP project, styled with Bootstrap, that fetches and displays information about a variety of the best biscuits from a MySQL database. In order to find the world's favourite biscuit; interactive features include being able to upvote and downvote biscuits within online sessions. Adhering to the SOLID principles and using the entity hydrator design pattern.

OOP

PHP

Work Experience

Design Assistant

Paul Costelloe

Jun 21 - Jun 22

Part of the design team in a London-based Fashion House. Involved in all areas of design from marketing material through to fashion design and production. Details included updating the company website, engaging in social media, and defining a strategy for future digital content. This led to me being responsible for branding and the design of marketing material. This has included organising and attending events, liaising with clients, and tracking all on-going projects.

Graphic Designer

Freelance & POWWR

May 20 - May 21

Worked with local businesses via freelancing and gained experience as the graphic designer in a marketing department of a global corporate company. These opportunities have included; packaging, branding, social media and website design. I developed a variety of company document templates for all departments, such as HR, Finance, Sales, and Product. This involved using the Microsoft Office Suite as well as the Adobe Suite. Working in WordPress, I designed and produced website pages and used these opportunities to gain some basic knowledge of CSS and HTML.
